Profile

A recent Front End Engineering graduate from The Iron Yard Orlando seeking a career in front end development. My interest and affinity for technology propelled me to transition into development from my career as a delivery driver. I am seeking a position that will challenge me and help develop my current skills along with opening the door to learning new skills. I am willing to relocate for the right job position.

Tech Skills

Dev Tools	HTML / CSS	JavaScript +	API & DATABASES
Command Line	HTML5 / BoilerPlate	VanillaJS	JSON
Git	CSS 3	jQuery	Google + API
Github	SASS	Angular 1	Firebase
GitFlow	BootStrap	Angular 2	resfFUL API
Yeoman	Less	Lodash	ASP.Net 5
Bower	Angular Material	restAngular	MongoDB
NPM		ReactJS	
Gulp		NodeJS	
Grunt		ExpressJS	

Projects

The Iron Yard Final Project: Don't Truck Yourself
A web application for truck drivers to communicate information about routes and stops to other drivers.

Portfolio Website
A webpage showcasing projects I have completed along with my personal information.
